Petition for Eugene Residents

Preserve the Natural Beauty of the Upper Amazon Creek Corridor: Stop the Proposed ATT/Crossfire Tower

More info: FriendsofAmazonCreek.org

I believe the proposed AT&T/Crossfire cell tower at 4060 West Amazon Drive would not blend with, but would rather dominate over, the natural and aesthetic characteristics of the Amazon Creek corridor in this south hills area. It would degrade, rather than preserve and enhance, the most desirable features of this scenic natural area and surrounding neighborhoods. It would not be reasonably compatible with the area, and would have substantial offsite impacts. It would forever detract from our enjoyment of this natural space. It would be visually and psychologically intrusive to those enjoying this unique natural area. There would be no adequate screening by standing trees shielding it from view from Amazon Creek, the Adidas/Rexius Trail System or Kincaid City Park. Its negative visual and psychological impact could never be mitigated. I urge City staff to recommend denial of, and the Hearings Official to deny, CUP application 14-003.
